

ZACH BALDER

FULL-STACK SOFTWARE ENGINEER

CONTACT

- 617-610-6243
- zmbalder@gmail.com
- https://zachbalder.me
- Greater Boston

SKILLS

Languages: JavaScript, TypeScript, HTML, CSS, Python, Shell, Go

Frameworks/Libraries: Next.js, React, Vue, Tailwind, 11ty, MUI, Shoelace, Express, Fastify, Hapi

Databases/ORMs: DynamoDB, MongoDB, PostgreSQL, Prisma, SQLite, Sequelize, Supabase, Dexie.js

Tooling: git, npm, Docker, Vite, eslint, prettier, ESBUILD, Rollup, Webpack, mocha, nyc, Cypress

AWS: EC2, S3, CloudFront, API Gateway, Lambda, ELB/ALB, IAM, CloudWatch

CI/CD/Cloud: GitHub Actions, Netlify, Cloudflare Pages, Vercel, Digital Ocean, Linode

Bug Bounty (HackerOne): Robinhood \$2k, Robinhood \$750, Glassdoor \$150

EDUCATION

Bachelor of Arts in Economics

Northwestern University

2013-2016 (3/4 complete)

Computer Science Courses

- Intro to Computer Programming
- Fundamentals of Computer Programming (C++)
- Intro to Artificial Intelligence (Python)

Interests

- Songwriting
- Music Production
- Saxophone
- Synthesizers & Sound Design
- Sci-fi
- Web Applications
- Computer Networking

ABOUT

I have 8 years' experience as a software engineer, building web applications and software infrastructure. Previously, I was technical cofounder of a web design startup, the first full-time engineer hire at a video-chat startup, and software engineer on the cloud services team at a wireless internet provider. I've built and led development teams, translated UI/UX designs into implementation, and converted requirements & customer needs into digital product.

WORK EXPERIENCE

Lead Software Engineer

Common Energy

May 2024 - present · 11 mos

- Leading feature development on residential subscriber sign-up flow
- Implemented Renewable Energy Credit (REC) UI display for business subscribers
- Launched web portal for sales affiliates to view, sort, and filter lead data

Contract Developer

Stealth startups

Sep 2023 - May 2024 · 9 mos

- Introduced new features from Figma designs in Next.js & Tailwind web application
- Defined new models in Prisma using a PostgreSQL database
- Implemented GraphQL routes to support beta functionality for early adopters

Cofounder & CTO

Wisiwig

Jun 2022 - Sep 2023 · 1 yr 4 mos

- Accepted into MassChallenge 2022 Early Stage program
- Coordinated technical sprint planning using GitHub Projects
- Built MVP Chrome extension for pilot program (featured on Chrome Store with >600 users)
- Built and deployed React application with API Gateway backend for managing user designs
- Translated Figma product designs into JavaScript, HTML, and CSS
- Set up analytics to provide quantitative evidence of user engagement for investor meetings
- Prepared investor demos to illustrate technical capabilities and product vision

Senior Software Engineer

Gatherly

Nov 2020 - Jun 2022 · 1 yr 8 mos

- Implemented event-wide video broadcast, a feature required by many customers
- Wrote unit, integration, and load tests to improve reliability and availability of services
- Created a staging environment, automated release process and rollbacks
- Introduced service logging to lower incident response times and improve customer support
- Secured cloud resources for SOC2 certification to acquire enterprise customers
- Migrated frontend to support virtual events with >1000 attendees and onboard larger clients
- On-call for handling downtime incidents and troubleshooting issues with virtual events
- Screened candidate profiles, designed take-home exercise, and conducted interviews

Software Engineer

Starry

Jun 2018 - Feb 2020 · 1 yr 9 mos

- Maintained internal projects that delivered internet to thousands of customers
- Developed encryption wrapper allowing our team to remove redundant code
- Built SNMP service to save technicians time when configuring field hardware
- Wrote full-coverage unit and integration tests
- Performed regular code reviews, QA'd applications, and committed bug fixes
